HIPS RETURNING from other missions, are bringing natural soda from Chile—for this year's biggest of all food production jobs. It is soda you know all aboutcan store and handle easily-can depend on for top and side dressing. How much will there be? That's hard to say, but last year Chile sent 1,000,000 tons to U. S. farmers and think what that would mean this year.

• Properly applied, 1,000,000 tons of Chilean Nitrate would produce 250,000,000 bu. of oats or 100,000,000 bu, of wheat: 125,000,000 bu. of corn or 4,800,000 tons of forage crops; 6.000,000 tons of vegetables or 2,500,000 bales of cotton and 1,100,000 tons of cotton seed.

Natural Chilean Nitrate, always a big factor in food production, is absolutely vital this year-enough and in time for all essential needs.

Penicillin-One Grand Report Woods Fires The annual report of the Rockenieller Foundation, here on my desk, tells this story: "In May, 1936, the Rockefeller Foundation received a letter from Dr. H. W. Florey, pro-fessor of pathology at Oxford (England), applying for a grant in aid of \$1,280. Dr. Florey, who was a former Rockefeller Foundation fellow, explained that he was developing a chemical approach to problems of pathology. He had recently added a blochemist to his staff

and had engaged a second chemist to join the group in September; the funds were needed to provide laboratory equipment. 'One grand' is small change in But it sometimes does big things in the hands of medical re searchers. That was 1936. This is 1944—and in 1944 you have been hearing about From J. L. Mercer, district state regidor. Piorester at Stamps, comes this cau- At a dinner commemorating his Wednesday.

nearest forester (as required by Pacific, MacArthur said: "When a towerman discovers a smoke he checks his records to see if some one in the area of the fire has given notice that they were going to do some burning on that date. If no notice has been given, then a Ranger is sent to that location of the fire to suppress it. Therefore it is necessary that all grass burning, brush burning and woodland burning be reported in order that a ranger will not have to travel to the ( ) fire when smoke appears. "Sorry Judge, my shipment of suspenders still hasn't come in. Some articles are mighty scarce these days. I don't get anywhere near as much as I could sell. "With the war going on, Frank, we've got to expect these things. It's true of luxuries just as it is of necessities. Take whiskey, for example. There's a real shortage in that. It's to be expected when you realize there hasn't been a drop of it distilled in this

country since way back in October, 1942.

"The only thing distillers have been making during that time is war-alcohol for the Government. So, I wasn't surprised a bit to read how bootlegging and black markets have sprung up around the country as a result of the dwindling supply. Our 13 years of prohibition proved that if folks can't get legal whiskey, they'll get illicit whiskey. Sure hope the shortage doesn't last too long. I'd hate to see this country turned over to the ootleggers again."
